

Take a new operation in charge

By clicking on the tab « **Opérations** » you get a view with a single button « Nouvelle opération ».

When you'll click on it, it will **open a new window** that will display the information of the **most urgent operation** in the prioritized list of operations. It also updates the status of the operation to IN PROGRESS : « réparation en cours » and sets the **current date** as the beginning of the repair.

The screenshot shows a new window titled 'Informations' with a sub-section 'Opération'. It contains the following information:

Informations

Technicien : Louis Endelicher

Véhicule : MZX-YS-34

Opération

ID Panne	Nom panne	ID Pièces nécessaires
1	Failure 1	1 - 2
2	Failure 2	1

Pièces nécessaires pour cette opération

ID Pièce	Nom pièce	Quantité nécessaire
1	PNEU	3
2	MOTEUR	2
1	PNEU	16

Ajouter

Commentaire

Is displayed in this window (for this operation) :

- some information about the **technician** namely his first and last name ;
- the **immatriculation of the vehicle** ;
- a **table with all the failures** : the ID, the name, the IDs of the parts needed for this failure ;
- another table with the ID, the reference and the quantity of every **parts needed** to fix all the failures ;
- a list where you can select a part and a quantity to use, **if you need more parts** (for exemple if one is defective...) and click the « Valider » button to validate ;
- a **comment** section ;
- two buttons « **Suspendre** » to suspend and « **Terminer** » to finish the operation.

- **What appends when you add a part for the operation ?**

A screenshot of a web form. At the top, there is a label 'Ajouter' followed by a dropdown menu showing 'AMPOULE' with a blue arrow icon, a text input field containing the number '2', and a button labeled 'Valider'. Below this is a section titled 'Commentaire' with a large, empty text area for input.

The system **updates the stock of the part** and will add in the comment area the information to permit you to **track the additional parts** of every operation **easily**.

A screenshot of the 'Commentaire' section of the form. The text area now contains the text '+2xAMPOULE', indicating that the system has automatically added this information to the comment.

- What happens when you click the button when you suspend the operation ?

The system **updates the status to SUSPENDED** : « suspendue » of the operation in the database with the actual date, **attributes a free parking** space to the vehicle and **sets the comment of the technician**. When an operation is suspended it automatically **changes its priority to top**. The window of this operation closes.

- What happens when you click the button when you suspend the operation ?

The system « closes » the operation by **updating the status of the operation to REPAIRED** : « réparé », **the stock of all the parts used** for the operation, **attributing a free parking space** to the vehicle and **setting the new comment** of the technician. The window of this Operations closes.
